## EXPERIENCE

---

### Revelyst

San Diego, CA

*Data Quality Analyst*

Sept 2025-Current

- Performed deep-dive data integrity and anomaly analyses across 36 brand data cubes and 4 ERP/on-prem systems, identifying duplication and erroneous records that directly affected enterprise reporting accuracy.
- Conducted data QA and validation of Python-based API scripts integrated with Cosmos DB, ensuring accurate ingestion of E-Commerce data pipelines.
- Reviewed Azure Data Factory pipelines to diagnose trigger failures and pipeline-level errors, providing detailed documentation and recommendations to engineering teams.

### Kikoff Inc

Remote

*Fraud Analyst*

Jan 2024 - September 2025

- Developed and executed advanced SQL analyses of transaction-level data to detect anomalies, saving the company \$70K+ per month through proactive fraud detection and risk reduction.
- Detected a J-1 Visa fraud ring responsible for over \$2 million in fraudulent payments, collaborating with Data Science to design an ML-based detection framework that improved early identification of high-risk transactions.
- Created robust automated processes through the integration of Python scripting alongside both Selenium and Playwright frameworks to minimize repetitive work activities; saved an estimated five hours per week on routine tasks related to fraud detection.
- Analyzed over 2,000 transactions weekly using SQL queries to identify patterns and flag suspicious activities, contributing to a more secure environment while minimizing false positives in fraud detection efforts.
- Authored detailed risk documentation and fraud incident reports, presenting findings and recommendations to the Risk Committee and C-Suite to guide strategic decisions on emerging fraud patterns and mitigation measures.

### Kikoff Inc

Reno, NV

*Customer Operations Analyst*

June-Jan 2024

- Conducted root cause analysis for customer and transaction-related issues, coordinating resolutions between Operations and Engineering teams.
- Managed Jira issue-tracking pipelines to streamline prioritization of fraud-related tickets and improve product feedback loops.

## EDUCATION

---

Western Governors University

*Bachelor of Science, Computer Science – 2024*

University of Nevada, Reno

*Bachelor of Arts, History – 2023*

## SKILLS

---

- Tools: Selenium, Playwright, Metabase, Amplitude, Jira, Freshdesk, Zendesk
- Languages: Python, SQL, T-SQL, JavaScript
- Data & Cloud: Snowflake, Databricks, Cosmos DB, Azure Data Factory, SSMS, SSAS
- Core Competencies: Fraud Analytics, Risk Data Modeling, ETL QA, Data Validation, Root Cause Analysis, Automation Script Development, API Testing, Experimentation Frameworks
